

HOW IS RESEARCH IMPROVING YOUR OATMEAL?

OATS

- New oats that are good for gluten-free, high-protein, and/or low glycemic index diets (Montana State)
- New oat varieties for winter grazing (Kansas State, UNL)
- Ways to use oats as cover crops to improve soil (UMN, Iowa State)
- Guidance for using fungicides (SDSU)

BLUEBERRIES

- Affordable automated machines that harvest blueberries quickly, but cause no damage (UGA)
- Ways to prevent damage during storage and packing (UF)

BANANAS

- Information about the optimal harvest maturity, browning susceptibility, and nutrient content of various banana types (Auburn)
- Ways to reduce chilling injury to bananas (UF)

ALMONDS

- Sensors and other tools to fine tune irrigation (UC-Davis)
- Ways to use insecticides during almond bloom so that bees are not exposed to toxins (UConn)
